

**EMO MILANO 2027
A JOURNEY TO THE HEART OF INNOVATION**

**THE LEADING EVENT FOR THE WORLD OF METALWORKING
PRESENTS ITSELF AT CCMT**

EMO, the world's leading trade fair dedicated to the metalworking industry, will return to Italy in 2027, organized by UCIMU-SISTEMI PER PRODURRE, the association of Italian manufacturers of machine tools, robots, and automation.

EMO MILANO 2027 will take place from October 4 to 8 at the fieramilano exhibition center.

Promoted by CECIMO, the European association for manufacturing technologies, and organized by EFIM-ENTE FIERE ITALIANE MACCHINE, the traveling event -alternately hosted by Hannover and Milan -will thus return to Italy after six years.

Indeed, it was in 2021 when, despite the pandemic, the organisers of EMO MILANO 2021 succeeded in attracting 60,000 operators from those countries that had given the green light to travel from their territories. Even in that peculiar situation, the figure confirmed the appeal of the event and of the **city of Milan, surely central and undoubtedly one of the best served and connected by international and intercontinental transport systems.**

After all, the previous edition, in 2015, was a real success considering the number of exhibitors and visitors, setting an all-time record for the Milan edition of the world trade show, both in terms of number of participants and square metres occupied.

The next edition is expected to be rich in content and opportunities for the operators of the sector: **EMO MILANO 2027 will propose a real "journey to the centre of innovation"**, as stated in the slogan chosen to accompany the event communication from now until 2027.

At EMO MILANO 2027, the entire spectrum of international products from the sector will be on display: metal cutting and metal forming machine tools, robots, automation systems, additive manufacturing, digital solutions, artificial intelligence. These are technologies on which the sustainable development of the planet depends, a theme that will be widely covered by the exhibition.

Special attention will be devoted to the organisation of the event which, given the industrial development expected in the coming years and the attractiveness of the city of Milan, is anticipated to be a sell-out fair. For this reason, the organisers of EMO MILANO 2027 have reserved all 12 exhibition halls available for the trade show and, starting in September 2025, a hospitality service will be offered to facilitate the booking of accommodations for operators in the city, which has become one of the most popular tourist destinations.

Therefore, thanks to the agreement signed with **MiCo DMC, the official and exclusive partner of EMO MILANO 2027 for the room booking service**, the operators of EMO MILANO 2027 can
